Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group 1, claims 1-14 are drawn to an apparatus for programming a non-volatile storage element having ***a programming mode indicator for indicating the coarse or fine programming mode***, a switchable charge packet metering circuit ***in communication with said mode indicator and said non-volatile storage element for providing a metered charge to said storage element*** in response to said mode indicator output indicating a fine programming mode;

Group 2, claims 15-25 are drawn to an apparatus for programming a set of non-volatile storage elements having control terminals and having ***an individual switchable charge packet metering system in communication with said control terminals***, said metering system is ***individually switched to provide a particular metered charge to program said non-volatile storage element in a fine mode without providing said particular metered charge to program the elements in a coarse mode***;

Group 3, claims 26-45 are drawn to a an apparatus and method for programming by ***“performing a coarse programming on a non-volatile storage element until a first threshold condition is detected”*** and ***“performing a fine programming phase for***

Art Unit: 2827

said storage element ***by a metering charge means after the threshold determination***".

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
